(54) Title: STORAGE SYSTEM FOR TRANSFER STABILIZING SUPPORTS

WO 2005/098765 A1

(57) Abstract: A method and system for storing and releasing objects onto a production line are disclosed. The system includes an enclosed space with an opening at a side surface adjacent a top thereof, a central structure of the enclosed space, a helical support disposed about the central structure providing layers of storage to store objects to be released onto a production line, and pusher means for moving stored objects around the central structure from the bottom of the enclosed space by pushing a number of stored objects to the top of the enclosed space and out the opening. The objects may be transfer stabilizing supports that are attached to odd-shaped objects for ease of conveyance; containers, or containers attached to transfer stabilizing supports.
